Rediteq Ltd.'s Sopro Online Now Available in the Microsoft Azure Marketplace

Microsoft Azure customers worldwide now gain access to Sopro Online competence development software to take advantage of the scalability, reliability, and agility of Microsoft Azure to drive application development and shape business strategies.

TURKU, Finland — September 11, 2018 — Rediteq Ltd. announced today the availability of Sopro Online in the Microsoft [Azure Marketplace](#), an online store providing applications and services for use on Microsoft Azure. Rediteq customers can now take advantage of the scalability, high availability, and security of Azure, with streamlined deployment and management.

Petri Huttunen, CEO, Rediteq Ltd., said, “We are happy to announce learning platform support for Azure Active Directory and H5P, which makes H5P available on the Microsoft platform for Azure AD users.” Support for Azure AD makes the system available for Microsoft cloud users using their existing credentials.

With Azure AD support, users of Office 365, Dynamics CRM Online, or Azure can easily take advantage of the modern Sopro Online mobile learning platform. Users can be imported directly from Azure and connected to their existing credentials. Using Office 365 offers a solid base to create and distribute learning materials, but a giant step forward can be taken by making use of interactive HTML5 learning material with H5P, integrated into Sopro Online. This material can be created by you or obtained online. H5P is based on open- source code and is mobile-friendly, offering tens of different content types and new ones being developed regularly. H5P has been growing in popularity and adoption rates on Moodle, WordPress, and Drupal platforms. With extended support for the Microsoft platform, H5P will also continue its growth among Microsoft users.

Sajan Parihar, Director, Microsoft Azure Platform at Microsoft Corp., said, “We’re excited to welcome Rediteq and Sopro Online to the Microsoft Azure Marketplace, which gives our partners great exposure to cloud customers around the globe. Azure Marketplace offers world-class quality experiences from global trusted partners with solutions tested to work seamlessly with Azure.”

The Azure Marketplace is an online market for buying and selling finished Software-as-a-Service (SaaS) applications and premium datasets. The Azure Marketplace helps connect companies seeking innovative, cloud-based solutions with partners who have developed solutions that are ready to use.

Take a Test Drive of Sopro Online today at Rediteq's [page in the Azure Marketplace](#).

Rediteq Ltd., established in 1991, is a Finnish software company focused on learning and competence management systems. Our company has a versatile product portfolio for companies and institutes.
